

RAJ VIR

Product Designer (Frontend Developer)

UX/UI & Product Designer with 4+ years of experience designing and shipping SaaS, ERP, and Fintech products across web, tablet, and mobile platforms. with hands-on experience building an Angular 18 project and successfully deploying a React + Vite portfolio website on GitHub.

EXPERIENCE PRODUCT DESIGNER

Fusionstak -UX/UI Designer

Product & Service Company | Pune May 2022 – Feb 2025

- Owned end-to-end product design as the sole designer in a 150+ employee company, covering user research, wireframes, high-fidelity UI, prototyping, and developer handoff.
- Led UX/UI design for 20+ applications (7 mobile, 2 tablet, 11+ web) across SaaS, ERP, and Fintech domains, ensuring usability and scalability.
- Built and maintained a design system that streamlined workflows, improved visual consistency, and accelerated development cycles.
- Partnered with product managers and frontend developers to define requirements, challenge assumptions, and deliver high-quality implementations.
- Delivered measurable impact by improving team productivity by ~30%, reducing user complaints, and simplifying complex workflows through usability-driven design decisions.

Freelance -Product Design

Product, ux/ui & Service Company Jan 2022 – Present

- Delivered UX/UI solutions for multiple clients across SaaS and web platforms
- Worked directly with stakeholders to translate business requirements into intuitive user experiences
- Mentored and guided junior designers, helping them improve design thinking, tooling, and execution quality

EXPERIENCE FRONTEND DEVELOPER

Fusionstak - Frontend Developer

Product, ux/ui & Service Company Dec 2024 – Feb 2025

- Developed a solid foundation in core frontend concepts, including component-based architecture and clean code practices in a production environment
- Contributed to UI implementation using Angular 18, collaborating with designers and engineers to refine and align components with design intent
- Used Git and Jira within agile workflows to manage code changes & reviews.

FLAGSHIP PROJECTS

Utility Plus - UX/UI Designer

SaaS Platform (Web / Tablet / Mobile)

- Designed a multi-platform utility management system enabling agencies to manage billing, records, and user data
- Reworked existing UX to simplify complex workflows, improving task efficiency and reducing operational friction
- Focused on usability, consistency, and clarity to increase adoption and day-to-day productivity

CloudGavel - UX/UI Designer

eWarrant SaaS Platform (Web / Mobile)

- Improved UX/UI for critical approval workflows used by law-enforcement teams
- Designed new modules to support faster warrant approvals and better system transparency

Portfolio Site Template - Developer

Website (Web / Mobile)

- Built with React, Node.js, and Vite, delivering a fast, modern, and developer-friendly portfolio template tailored for designers.
- Easy to customize and deploy, enabling designers to quickly showcase their work with responsive layouts and GitHub-ready hosting.
